PREFACE

The Office of Institutional Research prepares or reviews most surveys and reports about the University of Louisville for government, professional, and proprietary agencies. It provides analyses of all aspects of the University for the use of its managers and planners. Such reports and analyses treat specific aspects of the University, but no single report provides a general perspective on the total University. This Fact Book is designed to provide a single convenient source of basic factual information on a variety of subjects of interest to the University community.

This second edition of the Fact Book has been expanded significantly; it contains more historical data to provide perspective on the current year and many tables have been presented in greater detail to provide intramural perspective among the many units which comprise the University of Louisville.

Assembly of the material presented here involves many judgments as to inclusion, exclusion and form of presentation. Suggestions as to additions or modifications will be welcome. If more detailed information is needed on the material presented, please contact the Office of Institutional Research or the source indicated.

Sincere appreciation is due to all who contributed to this effort, especially to Kathleen M. Mounce for editorial supervision and to Dala Utley and Jackie Harned for graphics and typing.
